World-class. **Worldwide.**

We are **committed to quality** and we pay attention to detail in every project.

We have a **network of partners** with access to markets across the globe.

mAbxience
From lab to life

Biopharmaceutical development

+15 years of experience in biologic medicines

3 commercialized products
FDA, EMA, PMDA+

+5 New biosimilars in development

Our portfolio of biopharmaceuticals targets areas of **oncology, hematology** and **osteoporosis**.

In-house R&D competencies

End-to-end expertise and capabilities across development of the cell line, formulation, and manufacturing processes for DS and DP, along with robust design and execution of clinical trials.

Strong internal IP portfolio extending beyond research and development to encompass production IP, which ensures our competitive edge in the marketplace.

Outstanding regulatory capabilities with strong scientific review processes and leadership in submissions. Established track records with regulatory authorities worldwide.

Your trusted biologics CDMO partner

Agile and flexible manufacturing services

Our end-to-end CDMO services are **fully integrated and tailored to your needs**: from formulation to fill & finish, small-scale or larger quantities.

12 months from gene to BDS

Single-use bioreactors

For **efficient change over** and minimizing potential cross contamination.

with flexibility
from **2L** to **4,000L**
R&D bioreactors and commercial bioreactors

coming soon
12,000L batches

50,000L
capacity

74,000L
coming soon

7 commercialized products

+97% batch success rate

We're experts in antibody-like molecules.

We have a proven **track record in delivery** of high-value, high-profile biological projects, from

Antibodies
Monoclonal
ADCs
Bispecific

Fusion proteins
Fc Fusions
Multispecific proteins

Recombinant proteins
Hormones
Enzymes

State of the art facilities

Three multi-product plants in two continents

With cutting edge technology and **GMP approval** from regulatory

FDA | EMA | TGA (Australia) | PMDA (Japan)
ANMAT (Argentina) | COFEPRIS (Mexico)
Canada | ANVISA (Brazil)
among others

León site
Spain

Garín site
Argentina

Munro site
Argentina

We are mAbxience

A vertically integrated **biotechnology company** dedicated to the development and manufacture of biologics.

B2B presence in	Network of	Team of
+100	**+40**	**+1200**
MARKETS	PARTNERS	PEOPLE

Helping people live better
Making high quality medicines accesible to all.

Accessible.
Affordable.
Across the globe.
